

# Latest LBRY App Adds Tipping, Themes, and More

Samuel Bryan • Sep 21 2017

The latest LBRY app, v0.16, is now available. [Get it here](#) (`/get`).

[Release Notes](#)

Case 1:21-cv-00260-PB Document 70-19 Filed 06/03/22 Page 2 of 5

The screenshot shows the LBRY web interface with several sections:

- Spotlight: Top LBRYcasts**: A grid of 8 video thumbnails with titles like "Tabs or Spaces?", "Pillsbury Boy", "Does 'socially responsible...'", "Casually Explained: The...", "Destiny 2: Review in Progress", "Banned lecture at Linfield...", "EEVblog #1018 - ZeroPlus Logic...", and "Splashing Toons". Each thumbnail includes a small description and a "free" button.
- Community Top Bids**: A grid of 8 bid thumbnails with titles like "Holly singing The Happy Workin...", "GIF Contest Entries!", "LBRY Community Release", "GIF Contest Entries!", "Love", "LBRY Coin (LBC) GPU Miner for...", "Support Easy & Free Downloads", and "Legendary Wallp.". Each thumbnail includes a small description and a "free" button.
- @Rerez2**: A grid of 8 video thumbnails with titles like "OUT OF MEMORY", "REVISITATION", "E3 SURPRISES", "SURFACE GAMING", "ARMS RACE", "GAMING IN THE 90S", "EMULATION KICKS ASS", and "FMV GAMES". Each thumbnail includes a small description and a "free" button.

## Added

- Added a tipping button to send LBRY Credits to a creator. Credits sent in this way come into the wallets of creators as supporting claims for the content that was tipped.
- Added an edit button on published content. Significantly improved UX for editing claims (but more to do).
- Added theme settings option and new Dark theme.
- Added a new component for rendering dates and times. This component can render the date and time of a block height, as well.

- Significantly more detail is shown about past transactions and new filtering options for transactions.
- File pages now show the time of a publish.
- The "auth token" displayable on Help offers security warning
- More form refactoring, including the addition of a barebones `Form` component (further progress towards form sanity).
- CSS significantly refactored to support CSS vars (and consequently easy theming).

Fixed

- URLs on cards will now show an ellipsis if longer than one line
- Added `gnome-keyring` dependency to .deb (#386)
- Fixed some issues with invites (#552)
- Pressing enter on forms will no longer cause weird app behavior (#542)
